Subject: FlexCore, New Product Introduction – **Corner Column Ceiling Extension**

JMP is pleased to announce the addition of the **Corner Column Ceiling Extension** to the FlexCore Product Line:

- **Corner Column Ceiling Extensions** are generally used to increase the height of a Full Height Corner Column to 10', allowing projection through a suspended ceiling of up to 3", and to allow services to pass from the ceiling into the Full Height Corner Column and then into each of the adjoining Cores
- The nominal outside dimensions are 12" x 12", while the plumbing access area is 10" x 10". There are removable panels for access to plumbing within the **Corner Column Ceiling Extension** depending on the final configuration chosen
- See **Plumbing Access – Service Column & Corner Column** drawing for more details
- Each **Corner Column Ceiling Extension** includes hardware necessary for attaching to the Full Height Corner Column
- **Corner Column Ceiling Extension** paint color must match the primary color of the Core
- Please refer to Installation Instruction #9 and JMP Flex Laboratory System specification for all other information regarding the design and application of this **Corner Column Ceiling Extension**. NOTE: Field trim may be necessary depending on the height of the ceiling
